ABSTRACT OF THE DISCLOSURE

Disclosed are an information relevance display
method, program, storage medium and apparatus.
5   The method comprises a search designation step
which, by a search designation unit, designates
element information and attribute information; a
relevance information extract step which, by a
relevance information extract unit, extracts
10   attributes common to two pieces of element
information as relevance information from
possessed attributes of plural pieces of element
information designated in the search designation
step; a first network display step which, by a first
15   network display unit, displays a first network by
arranging and displaying, for the element
information and the attribute information
designated in the search designation step, the
element information as element nodes, and by
20   connecting with edges two element nodes possessing
common attribute information by referring to the
relevance information; and a second network display
step which, by a second network display unit,
displays a second network by converting possessed
25   attributes of the element nodes in the first network
into a display of attribute nodes for arrangement
and by connecting with edges the element nodes and

the attribute nodes of the possessed attributes thereof.
